Le Corbusier

[por uma arquitetura_1923]

“Três lembretes aos Senhores Arquitetos”

1_O Volume 2_**A Superfície** 3_A Planta

A Superfície

“A arquitetura sendo o jogo sábio, correto e magnífico dos volumes sob a luz, o arquiteto tem por tarefa fazer viver as superfícies que envolvem esses volumes, sem que essas, tornadas parasitas, devorem o volume e o absorvam em seu proveito: ...”

“A Superfície é o envelope do volume e pode anular ou ampliar a sua sensação”

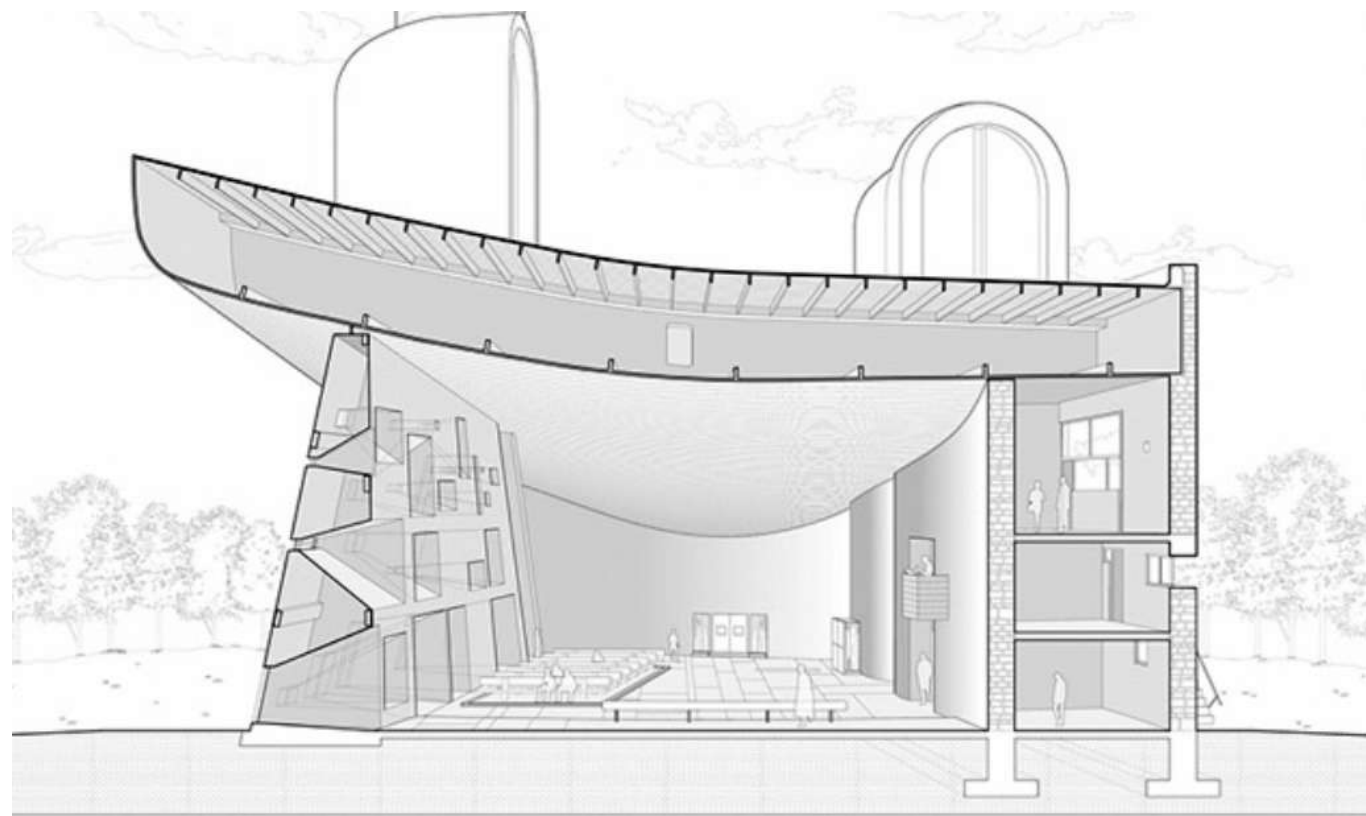

“Deixar a um volume o esplendor de sua forma sob a luz ... , é ver-se obrigado a encontrar na divisão imposta da superfície as linhas reveladoras, as geratrizes da forma. A superfície do templo ou da fábrica é, na maioria dos casos, uma parede furada de portas e de janelas; esses buracos são amiúde destruidores da forma”.
